

Indiana's Telephone Privacy Law has cut down dramatically on former junk and unwanted telephone calls. We request that you not, repeat not, lessen Indiana's Telephone Privacy law protections. Indiana's law has been effective and we request that you not undo what has worked. Frankly, we do not want these unwanted telephone calls. For the FCC to enact anything that lessens Indiana's protections, interferes with our freedoms and the freedom to use our time as we choose rather than to be interrupted at all hours by these unwanted calls. These unwanted calls amount to the same as terrorists acts.
